

Oxygen Free Copper Audio Cable

2 Core PVC Insulated Figure 8

Product Type:
Audio Cable

Application:

These cables are primarily used in larger installations such as public buildings, recreational areas and sports facilities. They have larger, more flexible conductors which results the ability to use in longer lengths without compromising on sound quality. The cables are not screened so should not be run in close proximity to mains cabling to avoid interference.

Standards:

REACH & RoHS Compliant

Construction:

Conductor:	Plain annealed oxygen free copper bunch strand
Insulation:	PVC insulation in a figure 8 cross-section
Colour:	Transparent, with RED tracer for core identification

Technical Information:

Nominal Conductor Size	Dimensions mm	Max Conductor Resistance (Ω /km @ 20°C)
189/0.10mm	6.5 x 3.2	13.16
315/0.10mm	7.6 x 3.7	7.9

Insulation resistance ≥ 0.010 M Ω .km

Flame propagation IEC 60332-1-2
